

iTek Announces A New Equipment Addition to The Family!

Greetings Test First Name,

The overarching goal at iTek is to find excellent, cost effective solutions for our clients. One avenue we take to meet this goal is to constantly be on the lookout for new equipment that will make us more productive, reduce waste, and make our products more cost effective for our customers. This being said, iTek is proud to announce another new addition to our equipment lineup, the GRAPHTEC FC8600-160.

This new piece of equipment will allow us to offer you a cost effective way to cut, short run, high quality graphics into any shape you desire, without incurring the costs of traditional die cutting. In addition to being able to cut your product all the way through, the GRAPHTEC can also kiss cut your adhesive backed graphics making them much easier to remove from the backer.

Some of the products the GRAPHTEC will be useful for are:

Window Stickers

Wall Graphics

Signs for Commercial or Residential Applications

Bumper Stickers

Product Labels

Vehicle Decals

And much more!!

We look forward to assisting you with any projects that may be a good fit for the GRAPHTEC, and would welcome the opportunity to show you how it can benefit your organization. If you have questions on this piece of equipment or any other printing related matters, please contact your Account Executive Test Account Executive at Test ACTEMAIL or Test Phone!

Thank you,
The iTek Team
